

Orbs Meetings was founded by Oncoplastic Surgeons, Douglas Macmillan and Stephen McCulley and was established as a forum to present advances in techniques and research in Oncoplastic and Reconstructive Breast Surgery. The first international scientific conference was held in Nottingham in 2008 so ORBS is celebrating its 10<sup>th</sup> Anniversary this year.

Orbs conferences are held annually alternating between technical and scientific programmes with the opportunity to visit oncoplastic and reconstructive focused exhibitors and hear from hand picked industry sponsors. In addition, we have extended our programme to include one day workshops as well as the Nordic Orbs Meeting (RRS Iceland) which took place 2014, 2016 and will take place later this year including live surgery. All content from this and all meetings can be found on [www.orbweb.com](http://www.orbweb.com)

**OrbsWeb** is the meeting's web companion, an extensive online library of presentations for clinicians working in the field of oncoplastic and reconstructive breast surgery. Registration for Orbsweb is free for those attending one of our meetings or workshops. Full access will be given to videos, presentations, abstracts and publications.
